

Ivan Petrov is an Adjunct Professor of Physics at Linköping University, Sweden. He was a Professor of Materials Science and Principal Research Scientist at the Frederick Seitz Materials Research Laboratory (1998-2010), and Director of the Center for Microanalysis of Materials at the University of Illinois at Urbana-Champaign. He has served as a Visiting Professor of Materials Science at the National Taiwan University of Science and Technology (2018-2021) and a Visiting Professor of Surface Engineering at Sheffield Hallam University, UK (2000-2012). Ivan earned his Ph.D. in Physics from the Bulgarian Academy of Sciences and received the Doctor Honoris Causa Degree from Linköping University, Sweden. His research interests include nanostructural and nanochemical analyses, thin film physics, and surface science and engineering. Ivan conducted the first systematic study of the effects of ion/metal flux ratio and ion energy on microstructure evolution in hard coatings, employing a combination of analytical techniques. He was a Co-principal Investigator in the US Department of Energy Transmission Electron Aberration-corrected Microscope (TEAM) project which achieved 50 pm resolution. His *JVST A* review article on *Microstructural Evolution of Thin Films* has > 1950 citations. Ivan is an Editor of *Surface and Coatings Technology* and member of the editorial board of *AVS Quantum Science*. Ivan is a Fellow and Honorary Member of AVS and received the 2009 Bunshah Award and Honorary Lecture from the Advanced Surface Engineering Division and the 2013 AVS John Thornton Award and Honorary Lecture. Ivan served as the 2015 AVS President.
